

## Notice of Collection

Cancer Care Ontario (CCO) collects provider information pursuant to the Personal Health Information Protection Act, 2004 (PHIPA) under its statute as both a Prescribed Entity and Prescribed Registry. CCO also collects provider information pursuant to its mandate under the Cancer Act. Provider information may constitute personal information and includes any information about an identifiable physician and their clinical performance. As an example, a physician level report containing a provider's name, CPSO number and indicators related to their performance may constitute a record of personal information.

Providers' information is used to produce provider-level quality reports for Patient Enrolment Model (PEM) physicians participating in the Ontario Breast Cancer Screening Program (OBSP), Colon Cancer Check Program (CCC), and Ontario Cervical Screening Program (OCSP). The goal of these reports is to improve the quality of cancer screening services across the province. CCO works with Regional Primary Care Leads (RPCLs) who are responsible for leading quality improvement initiatives with individual PEM physicians who practice in their region. RPCLs will be provided with individual PEM Physician Outcome Reports and aggregate data for all PEM Physicians in their region. If there is an opportunity for quality improvement, this information will be used by the RPCL to engage the PEM physician and discuss a personalized quality improvement strategy. Information collected during these discussions will be provided to CCO to track the progress of quality improvement initiatives across the province. Additionally, CCO may engage with relevant Regional Cancer Program (RCP) and/or facility leadership to discuss and facilitate cancer screening quality improvement initiatives, which may include discussions about the status of a PEM physician.

Please note that all information collected by the RPCLs, including any written documentation, will not be used and/or disclosed for any purpose other than the above stated objective or as legally required.
