Subject: Change to Outpatient CT & MRI Requisition Forms – Effective October 1, 2025

---

Effective Wednesday October 1, 2025, **new Outpatient CT and MRI requisition forms** for all Ontario Health West Hospitals are being launched. This includes Joseph Brant Hospital. The new referral forms for CT and MRI can be found via the following link: [OH West Diagnostic Imaging Central Intake Requisition Forms](#). It is important to note that as of October 1, 2025, only the new requisitions will be accepted.

The change in Outpatient requisition forms is one of the first steps in implementing the Ontario Health West Diagnostic Imaging Central Intake Program. In the future, once launched, this program will provide a single point of intake and common regional approach to outpatient MRI and CT referrals for providers. More information about the Ontario West Diagnostic Imaging Central Intake Program can be found here: [We-Care 2 Image Ontario Health West DI Central Intake Program](#)

Thank you for your attention to this update, and we appreciate your cooperation in ensuring a smooth transition to the updated referral forms.
