Re: Interprofessional Primary Care Team (IPCT) Expansion - 2026-2027 Call for Proposals

What is happening?

- On September 22, 2025, the Ministry of Health ('ministry'), in collaboration with Ontario Health, launched the [2026-2027 Call for Proposals](#) to expand or create approximately 75 primary care teams that will attach 500,000 more people to primary care.
- This is part of the Government's \$2.1 billion investment towards Ontario's Primary Care Action Plan which will expand or create over 300 new and expanded primary care teams across the province to attach two million more people to a primary care clinician or team by 2029.

What does this mean locally?

- The expansion is an exciting opportunity to either *create* or *expand* interprofessional care primary care team (IPCT) models.
- Organizations interested in submitting a proposal under the IPCT expansion will work directly with the Burlington Ontario Health Team (BOHT) and BOHT Primary Care Network Leadership Council (PCNLC) to develop a proposal aligned with key provincial and local priorities.

Who is eligible?

Proposals can be submitted to create or expand one of the following approved interprofessional primary care team models:

- Family Health Teams (FHTs)
- Community Health Centres (CHCs)
- Nurse Practitioner-Led Clinics (NPLCs)
- Indigenous Primary Health Care Organizations (IPHCOs)

What are the next steps?

Interested parties are asked to please contact the Burlington Ontario Health Team at ohsupport@burlingtonoht.ca by no later than **October 7, 2025 at 5:00 pm**.

In your response, please ensure to note of the following:

- Whether your IPCT proposal will reflect the creation of a net new IPCT team *or* expansion of an existing team
- Your intention to collaborate with the BOHT and BOHT PCNLC in the development of the proposal
- Confirmation of readiness to implement/operationalize any proposal by no later than **Spring 2026**
